

APPENDIX D

ON-SITE PRIVATE SECTOR SUPPORT

This appendix provides examples of Service depot support provided at the depot facilities by on-site contractors. It demonstrates the Services are working with the private sector to obtain the best value for both the accomplishment of depot maintenance workloads and the services needed to support depot maintenance operations by augmentation of the depot workforce with contract personnel, and use of contract field teams. The tables below are not all-inclusive, but provide a representative picture of private sector on-site activity.

Army

ANAD On-Site Contractors – FY96 & FY97

<u>Contractor</u>	<u>WBS/Workload</u>	<u>Contractor(s) Role</u>
